Results-driven Computer Science undergraduate pursuing B.Tech with hands-on experience building real-life MERN applications, demonstrating strong problem-solving and analytical skills. seeking a Software Engineering Internship to apply strong MERN stack and backend development skills. Eager to contribute to impactful projects and grow through real-world experience.

EDUCATION

- Bachelor of Technology (B.Tech) in Computer Science Engineering
- Deen Dayal Upadhyaya Gorakhpur University, Gorakhpur, India
- Expected Graduation: February, 2026

TECHNICAL SKILLS

- Languages & Markup: JavaScript (ES6+), HTML5, CSS3, Python
- Frameworks/Libraries: React.js, Node.js, Express.js, Tailwind CSS, EJS
- Databases: MongoDB, MySQL (basic)
- Tools & Others: Git, GitHub, Postman, VS Code
- Concepts: REST APIs, MVC architecture, Authentication, Session & Cookies
- Soft Skills: Communication, Team Collaboration, Problem-solving

PROJECTS

01. NOTES WEB APP | MERN STACK

- Led a team of 6 to build a full-stack notes app with MongoDB, Express, React, Node.js.
- Added user authentication, CRUD features, and a responsive UI (Tailwind CSS).
- Implemented backend validation, error handling, and secure session management.

02. HOMITLY - AIRBNB CLONE | NODE.JS, EXPRESS, MONGODB, EJS

- Built a full-stack accommodation booking platform with property listings, booking management, and user authentication.
- Integrated Cloudinary for image uploads, Nodemailer for booking confirmations, and secure session handling with Passport.js.
- Implemented backend validation (Joi), server-side rendering (EJS layouts), and responsive UI for seamless user experience.
